Abstract

Currently, the use of virtual classrooms is very important to encourage interaction between students and language teachers, as a foreign language (LE) or as a second language (L2). In this paper, we study the importance of the use of authentic material in all its varieties through of the virtual classroom in learning a foreign language. And that among the most complete materials is the audiovisual, because it allows to develop the linguistic, sociolinguistic and pragmatic competence of the language. It is also highly motivating and develops verbal and non-verbal communication. There is an abundance and variety of authentic digital material on the internet and teachers should know how to select them according to the needs and communicative realities of the student body. The use of authentic materials through virtual classrooms is necessary for present and future generations and a recommendation is made imperative for use.

Key words: English as a Foreign Language (EFL), Authentic Material, Speaking Skill
