January 28, 2022

* * * * *

Tết (a.k.a lunar new year) of Vietnamese is coming, and 2021 is near the end. During 2021, I have accomplished various achievements that I could not have imagined before, such as the proposal of the Bayesian Mindsponge Framework [1,2], the first Vietnamese and international books [3,4], the successful combination of Bibliometrics-Bayesian-Mindsponge [5,6], and especially the contribution to the continuing development of the Serendipity-Mindsponge-3D (SM3D) knowledge management framework [7-11].

I thought there would be no good news before the year ends. However, today I received an email stating that I am officially approved to become a doctoral candidacy by the Ritsumeikan Asia Pacific University's Dissertation Committee. Indeed, the approval is very good news and a very meaningful gift for my lunar new year.

I know that luck is not always with me, and opportunity is not always available, so 2022 can be a tough year. However, the candidacy approval and my other achievements in 2021 are strong motivations for me to strive for the best in 2022.
