Table 1 in Frankenhuis et al., 2017, *Evolutionary Behavioral Sciences*

This preprint contains Table 1 of the following published manuscript:

Frankenhuis, W. E., Roelofs, M. F. A., & de Vries, S. A. (2017). Does exposure to psychosocial adversity enhance deception detection ability? *Evolutionary Behavioral Sciences*. Advance online publication. <http://dx.doi.org/10.1037/ebs0000103>

Table 1: Descriptive statistics for each group on the independent variables. For Study 1, inferential statistics comparing groups using Wilcoxon Signed Rank tests (p-values) and Bayes Factors (computed using Bayesian Independent Samples T-Tests). NVS stands for Neighborhood Violence Scale.

Scales	Study 1			Study 2	
	Community	Students	Tests		Students
	Median (range)	Median (range)	W	1-sided BF ₁₀	Median (range)
Past NVS	3.29 (1.14–6.43)	1.71 (1.14–6.00)	1548 ^{***}	977	1.71 (1.00–5.29)
Current NVS	3.86 (1.14–6.14)	2.43 (1.29–5.71)	1635 ^{***}	268,866	2.29 (1.14–5.29)
Harsh parenting	1.90 (1.00–4.88)	1.42 (1.00–2.92)	1292 ^{**}	10	1.41 (1.00–4.08)

Note. * = $p < .05$, ** = $p < .01$, *** = $p < .001$.
