Abstract

OPPO itself has secured its authorization earlier for screens full of bangs than Apple. Not only that, OPPO also became the first smartphone manufacturer to obtain authorization for a full screen with poni.

It is known, Oppo has registered many patent applications since 2009, reaching a total of 20 thousand patents. In 2017, Oppo was in eighth position among 10 Chinese companies that had many authorized patents. Oppo is the only smartphone manufacturer on the list

keywords : patent poni screen oppo smartphone

A. INTRODUCTION

Recently, photos and leaked videos of the latest OPPO products with full screens that have bangs on the top, namely R15 and R15 Plus, have appeared on the internet. Of course this has sparked a lot of reaction from netizens because the design looks similar to the iPhone X which has poni at the top and a screen with a thin bezel on all parts.

But the shocking news revealed that OPPO actually intended to develop a full

screen smartphone with poni on ellipse, half bow and various other forms. For the OPPO R15 and R15 Plus variants, it turns out that OPPO finally chose to use the fifth design from the proposed OPPO patent portfolio. Although the patent application was submitted very early, in fact OPPO did not want to rush to use it commercially

Alen Wu, the Vice President of OPPO, also said that there are many factors that need to be considered before OPPO

finally decides whether a technology will be used on its products, including the possibility of mass production

You could say, OPPO itself has secured its authorization earlier for a screen full of poni than Apple. Not only that, OPPO also became the first smartphone manufacturer to obtain authorization for a full screen with poni.

It is known, Oppo has registered many patent applications since 2009, reaching a total of 20 thousand patents. In 2017, Oppo was in eighth position among 10 Chinese companies that had many authorized patents. Oppo is the only smartphone manufacturer on the list.

B. CONCLUSION

You could say, OPPO itself has secured its authorization earlier for a screen full of bangs than Apple. Not only that, OPPO also became the first smartphone manufacturer to

obtain authorization for a full screen with poni.

It is known, Oppo has registered many patent applications since 2009, reaching a total of 20 thousand patents. In 2017, Oppo was in eighth position among 10 Chinese companies that had many authorized patents. Oppo is the only smartphone manufacturer on the list.
