Finding Our Community: Iterating Data Science & Visualization Services

Mia Partlow | NC State University Libraries
Designing Libraries VIII, Atlanta, GA

Hunt Library Dataspace

Peer Consultation Services

STAFFED HOURS

Monday, Sep 30	
12pm- 2pm	Matlab, Python, R
2pm- 6pm	Tableau, SQL, R
3pm- 6pm	GIS, Excel
6pm- 9pm	Deep learning, computer vision, Python

See the full calendar: [Hill](#) | [Hunt](#)

Goals for the Dataspace

- Provide computing power, software, and expertise so students can develop foundational skills in data science.
- Reach undergraduates and those who might not otherwise contact use for data science support.

Our First Year: Dataspace Consultations

Our First Year: Computer Usage

**Transactional data only gives us
part of the picture**

Collecting Qualitative Data for Service Improvement

- Computer reservations were causing confusion and frustration
- Most people learn about the space by walking by it
- We have the hardware (according to 93% of survey respondents) and software (91%) they need...

...but students want more of everything: more laptop stations, multi-monitor group stations, advanced PCs.

Hill Library Data Point: Pop-Up Consultations

Data Experience Lab

Thank you!
